

I CLAIM

1 1. A manufactured chimney cap comprising an integrated flu pipe
2 extending from a pitched top plate secured to a cap frame via a
3 rim, and being encased in a weather-proof aesthetically pleasing
4 material.

1 2. The chimney cap of Claim 1 wherein said integrated flu pipe
2 mates with an existing flu pipe in a chimney.

1 3. The chimney cap of Claim 1 wherein said integrated flu pipe
2 is affixed to said pitched top plate so as to form a single unit.

1 4. The chimney cap of Claim 1 wherein said top plate has an
2 outer lip around its perimeter.

1 5. The chimney cap of Claim 1 wherein said top plate pitches
2 downwardly from said integrated flu pipe to said outer lip

1 6. The chimney cap of Claim 5 wherein said outer lip is
2 compressed between said cap frame and said rim both to secure it
3 to the cap frame and to form a weather resistant barrier.

1 7. The chimney cap of Claim 6 wherein a long life caulking is
2 applied over a joint formed between said outer lip and said rim to
3 divert moisture off said top plate and over said rim.

1 8. The chimney cap of Claim 7 wherein said rim and cap frame are
2 encased in a waterproof decorative material.
